Please replace the Abstract with the following rewritten paragraph:

-- A grip adapted for attachment to a writing implement includes a longitudinally extending tubular shell having an inner surface and an outer surface. The grip further includes a viscoelastic hand/finger surface formed about the outer surface of the tubular shell.

IN THE CLAIMS:

92

Amend claims 1 and 3-11 as follows:

- 1. (Amended) A writing implement, comprising:
 - a main body having a gripping portion;
- a grip shaped and dimensioned to fit about the gripping portion of the main body so as to be releasably secured to the main body,

the grip including a longitudinally extending, tubular shell having hardness sufficient to maintain the shape of the grip, the shell has an inner surface abutting with the main body and an outer surface, and a viscoelastic hand/finger surface positioned about the outer surface of the tubular shell; the shell further including proximal and distal lips retaining the viscoelastic

(Amended) The writing implement according to claim 2, wherein the viscoelastic hand/finger surface is a viscoelastic solid-phase polymer material.

hand/finger surface positioned in a central section of the tubular shell.

B

- A. (Amended) The writing implement according to claim 3, wherein the viscoelastic solid-phase polymer material is a thermoplastic elastomer.
- (Amended) The writing implement according to claim 2, wherein the viscoelastic hand/finger surface is a viscous liquid material contained within an elastomeric bag.
- (Amended) The writing implement according to claim 5, wherein the viscous liquid material is a silicone gel or silicone oil.
- 7. (Amended) The writing implement according to/claim 1, wherein the grip is integrally formed with the main body of the writing implement.
- 8. (Amended) The writing implement according to claim 7, wherein the viscoelastic hand/finger surface is a viscoelastic solid-phase polymer material.
- 9. (Amended) The writing implement according to claim 8, wherein the viscoelastic solid-phase polymer material is a thermoplastic elastomer.
- 10. (Amended) The writing implement according to claim 7, wherein the viscoelastic hand/finger surface is a viscous liquid material contained within an elastomeric bag.
